Week 13: COMP-801 - Integrated Computing Practice

Agenda

- Review completion of Week 12 development plan
- Discuss Week 14 development plan
- In-class project work to update project boards with Week 12 and 14 development plans
- Review and discuss project presentation and demo requirements
- Due next week

Testing and Design Considerations - Input

- What data attributes are you using, and why?
- Why do these have data relevant to your investigation questions?
- What are the data types for each attribute?
- What data structures are you considering for input data?

Testing and Design Considerations - Output

- What data structures are you considering for the output data?
- How does this data structure answer your investigation questions?
- Create examples for the testing functions
  - Two small datesets for each question
  - Use Excel to compute the expected output

Project Guidelines and Requirements

- Project Timeline
- Project Guidelines
- Project Presentation and Demonstration
- Project Report Template
